

Technical Datasheet

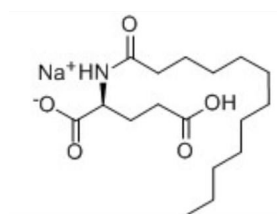

Production Name: Sodium lauroyl glutamate

CAS NO: 29923-31-7

MF: C₁₇H₃₀NO₅.Na

MW:351.42

Molecular Structure:

Product image

Specification list

Appearance	White powder
MF	C ₁₇ H ₃₀ NO ₅ .Na
MW	351.42
EINECS No	249-958-3

Package: 25kg/fibre drum

Application: It is not only easy to degrade, antibacterial, safety and non-allergic. Moreover, because of its special structure, it has many excellent properties as amphoteric surfactants, such as good water solubility, strong salt resistance and pH response.
